## **PRE-SEA SECTION AN UNFORGETTABLE EXPERIENCE**

Nobody gets sound sleep the night prior to a workshop visit. This was experienced by the students of GP-I on the night of 23rd Oct 2018, as they awaited the visit to Mazagoan Docks the next day. Our journey commenced on 24th Oct, at 0900 hrs as we boarded the bus and left the campus. We were accompanied by Capt S. P. Roy, Mr Mandal and Mr. J N Kamath. After alighting from the bus at ONGC, we boarded the ferry for Ferry Wharf and reached Mazagoan docks after an hour. After a kilometre long walk, we finally reached the workshop. Our professors explained all the specifications of the workshop, the different workshops and the repair work carried out in them. Fortunately, our class got the opportunity to board an SCI, Dynamic Positioning Vessel, OCEAN SAPPHIRE, kindly arranged for by Capt S. P. Roy. Due to his acquaintance with the Master, permission was granted for 39 students to board the vessel in 4 groups of 10 each.

The students of GP-I mustered near the gangway and were given strict instructions to be well disciplined on board. We boarded the ship in a queue, up the gangway. We visited the Engine Room, accompanied by Capt. Roy. The Engine Room was extremely noisy and we weren't able to hear anything explained to us. We saw the sewage treatment plant, incinerator and boiler. We were not allowed to move around in the engine room, for safety reasons. Then we were taken to the Engine Control Room where the Third Engineer, who was on watch, addressed us. The Engine Control Room was absolutely silent because of the sound proof doors. The Third Engineer explained the use of the Control Panel. He specifically mentioned that 'Dynamic Positioning Vessels' like the Ocean Sapphire has more advanced machinery, bow thrusters and special controls that most vessels don't have. On the way back we saw the laundry room and the crew accommodation. They were clean and tidy but quite compact. Then the cadet on duty took us to all the levels of the ship. He showed us the windlass, rescue boats, bitts, winches, mooring ropes, cargo loading lines, fire lines, containers, etc. He cleared all our doubts quite confidently, although it was his first experience on board.

Our next visit was to the most awaited location of the vessel, the Bridge. We were welcomed by the Second Officer who was on duty. He showed us the Radar screens, charts, compasses etc. The view from the bridge was mesmerizing and I personally enjoyed the peaceful ambience. The time allotted on the bridge was limited so we thanked the second Officer and the others for their valuable time and information they imparted to us. Their excellent conduct and mannerism was a good example to learn from. As we alighted from the ship, we saluted all the officers.

We boarded the ferry for ONGC and were soon on the campus by 1600 hrs. We thanked Capt. S. P. Roy for giving us such a wonderful opportunity. I thank T S Rahaman for arranging such visits; that create lifelong memories which we will cherish forever.

On board a Dynamic Positioning Vessel- 'OCEAN SAPPHIRE'  
during the Workshop Visit at Mazagoan Docks.

**RATING ATHARVA AWALE  
GP-I (BATCH 62)**
